

DEVELOPER

- OS-471** Developer with **very high water softening capacity** that contains **465-g/L potassium carbonate**. Cleaner / softener is **superior** to competitive products.
- OS-490** **Concentrated hard-water tolerant** developer that contains **660-g/L potassium carbonate**. Cleaner / softener is **superior** to competitive products.
Both of these developers keep the equipment much cleaner, reducing the need & frequency of cleaning & maintenance.

RESIST STRIPPER

- OS-902** Glycol ether based stripper for outerlayers that is **great for removing resist from tight spaces & over-plated areas**.
- OS-987** Concentrated stripper for outerlayers that **contains no glycol ethers**, yields filterable resist particles, & has good bath life. **Can be used for pattern & layers in one machine**.
- OS-992** Concentrated non-caustic stripper for innerlayers that **leaves the copper surface free of blemishes & ready for AOI**.

DEFOAMER

- OS-419** Defoamer that is **very effective for resist strippers** & can be used for developers.

SOLDER STRIPPER

- OS-201** **First part** of a two-step solder stripping process that strips down to the intermetallic & stops.
- OS-251*** **Regenerable second part** of a two-step solder stripping process that removes the intermetallic layer & leaves a bright copper surface with anti-tarnish protection. **Patented*
- OS-254** **Single-step spray** solder stripper that is fast, has good bath life, & leaves a bright copper surface with anti-tarnish protection.

SCREEN CLEANER

- OS-108** **High performance** screen cleaner with a pleasant odor that is friendly to both the worker & the environment.

SOLDER MASK REMOVER

- OS-953*** **Long lasting** solder mask remover that effectively removes most aqueous processible solder masks with little difficulty & **no FR4 laminate attack**. **Patented*
- OS-965*** Removes solder masks **without attack or measling** of sensitive laminates, such as polyimide. **Patented*

ACID CLEANER

- OS-303** Removes **fingerprints, chromates, oxides & soils** from copper & is very free rinsing.
- OS-317** **Low foam spray** cleaner of fingerprints, chromates, oxides & soils from copper that is also very free rinsing.

EQUIPMENT CLEANER

- OS-452** **Effective cleaner for spray equipment** such as resist strippers, etchers, solder strippers, & developers. **Superior to competitive products**, particularly on LPI developers when used along with OS-452A.

*We have many other choices for each type of product listed above as well as **Solder Brighteners, Fluxes, Microetch / Cleaners, Waste Treatment Chemicals** & others.*
